

4-H Computers Proficiency Program A Member's Guide

OVERVIEW

The 4-H Computers Proficiency program helps you learn what you need to know about your 4-H project. Your project leader will assist you in setting and achieving your goals. Through your project, you will learn more about how the computer works.

There are many resources to help you learn more about your project:

- The University of California Davis has free resources available online by visiting: <http://anrcatalog.ucdavis.edu/4HYouthDevelopment/>. This site lists a variety of project materials and resources recommended for use in your project.
- The Lassen County 4-H Resources and Lending Library at our county 4-H Office includes other books, videos, and reference materials that can be checked out by members and leaders.

There are five levels in the Project Proficiency Program. You may choose how many levels you wish to complete:

- ◆ Level I – “Explorer”, you begin to learn about many different aspects of computers.
- ◆ Level II – “Producer”, you practice and refine the many skills involved in learning about computers.
- ◆ Level III – “Consumer”, you become an experienced computer technician.
- ◆ Level IV – “Leader”, allows you to show your own leadership potential.
- ◆ Level V – “Researcher”, you carry out a demonstration on some aspect of computers, and prepare a paper or portfolio.

As you work through the proficiency program, your leader will date each skill item as you complete it. When all items in a proficiency level are completed, your leader will sign the Certificate of Achievement.

COMPUTERS

Level I - Explorer

Date
Completed

- _____ 1. Know the meaning of the following terms or phrases:
- Software
 - Hardware
 - Directory
 - DOS
 - "boot"
 - Bit/byte
 - CPU
 - Floppy disk
 - Bug/debug
 - File
 - RAM
 - ROM
- _____ 2. Know how to set up a computer (i.e. connect monitor and printer to computer, etc.)
- _____ 3. Know how to install various programs into the computer system and configure them properly.
