

Drought Programs, Strategies, and Resources for Ranchers
July 7, 6:00 to 7:30 PM
Jensen Hall, Lassen County Fairgrounds

Ranchers are facing the most severe drought conditions in memory with limited forage growth, little stock water, and high risk of wildfire on the range.

We will provide key information on drought insurance, disaster relief programs, and other tools to get through the current drought cycle with the least impact to your bottom line.

There is no charge for this program and light refreshments will be provided.

6:00 PM Start

- **Tina Saitone, Cooperative Extension Specialist, UC Davis, Livestock and Rangeland Economics - *Can You Insure Against Drought? Optimizing Your Outcomes from the Pasture, Rangeland, and Forage (PRF) Insurance Programs.*** Dr. Saitone will discuss how to get the most value out of a PRF insurance program including analysis specific to Lassen County.
- **Brenda Richter and Debi Michaels - USDA Farm Services Agency – *Critical FSA Program Info for 2021.*** Summary of current drought and disaster programs, sign-up deadlines, and how to be prepared and document potential drought and disaster losses this year. This is a very practical overview for ranchers and Brenda and Debi will get you all you need to know.
- **David Lile, Range and Livestock Advisor, UCCE Lassen County - Lessons of prior drought cycles, drought resources, and wrap up discussion**

7:30 PM Adjourn

Provided by UC Cooperative Extension and USDA Farm Services Agency
